

The Only Ready-to-use RSV Vaccine in a Pre-filled Syringe

ACIP recommends all adults aged ≥ 75 years and adults aged 60–74 years at increased risk for severe RSV disease should receive a single dose of RSV vaccine.^{1*}

RSV infection can lead to severe illness, hospitalization, and death in **adults aged 60 years or older**—and those with **comorbidities** are at increased risk.^{1,2}

Congestive
heart failure
(CHF)

Chronic obstructive
pulmonary disease
(COPD)

Diabetes

Asthma

Advanced
liver or kidney
disease

Protect older adults against RSV infection with mRESVIA—the only ACIP-recommended RSV vaccine available in a **ready-to-use pre-filled syringe**.^{1,3}

Indication

mRESVIA is a vaccine indicated for active immunization for the prevention of lower respiratory tract disease (LRTD) caused by respiratory syncytial virus (RSV) in adults 60 years of age and older.

Important Safety Information

Contraindications

Do not administer mRESVIA to individuals with a history of severe allergic reaction (e.g., anaphylaxis) to any component of mRESVIA.

Warnings and Precautions

- **Management of Acute Allergic Reactions:** Appropriate medical treatment must be immediately available to manage potential anaphylactic reactions following administration of mRESVIA.
- **Syncope:** Syncope (fainting) may occur in association with administration of injectable vaccines, including mRESVIA. Procedures should be in place to avoid injury from fainting.
- **Altered Immunocompetence:** Immunocompromised individuals, including those receiving immunosuppressive therapy, may have a diminished immune response to mRESVIA.

Please see additional **IMPORTANT SAFETY INFORMATION** throughout, and scan or click the QR code on page 2 for [mRESVIA Full Prescribing Information](#).

Ready-to-use mRESVIA Can Help Streamline RSV Vaccination

Available in a Convenient Pre-filled Syringe³

- ✓ Pre-filled syringe presentation without the need for reconstitution.³
- ✓ Option to thaw at refrigeration or room temperature. mRESVIA is ready to use once thawed to room temperature.^{3†}

Talking Points to Help You Confidently Initiate Conversations With Patients

- As we age, adults are at higher risk for severe consequences from RSV infection^{1,2*}
- Severe RSV infection can include lung infection, pneumonia, and worsening of serious conditions, such as asthma, COPD, or CHF; RSV infection in older adults may even lead to hospitalization or death²
- Based on your age, I recommend you receive your RSV vaccine today—it's easy to schedule^{1,3}

Important Safety Information (Cont.)

Adverse Reactions

In a clinical trial, the most commonly reported ($\geq 10\%$) adverse reactions were injection-site pain (55.9%), fatigue (30.8%), headache (26.7%), myalgia (25.6%), arthralgia (21.7%), axillary (underarm) swelling or tenderness (15.2%), and chills (11.6%).

To report suspected adverse reactions, contact ModernaTX, Inc. at 1-866-663-3762 or VAERS at 1-800-822-7967 or <https://vaers.hhs.gov>.

*Comorbidities that increase risk of severe RSV disease include, but are not limited to, chronic kidney disease, obesity, chronic obstructive pulmonary disease, asthma, and diabetes.¹

[†]Stored frozen between -40°C to -15°C (-40°F to 5°F), with the option to thaw at refrigeration or room temperature. A carton of 1 pre-filled syringe can be thawed at refrigeration 2°C to 8°C (36°F to 46°F) for 60 minutes or at room temperature 15°C to 25°C (59°F to 77°F) for 45 minutes. A carton of 10 pre-filled syringes can be thawed at refrigeration 2°C to 8°C (36°F to 46°F) for 155 minutes or at room temperature 15°C to 25°C (59°F to 77°F) for 140 minutes.³
